Company Fact Sheet

CORE VALUES

We firmly believe that our success as a company is dependent on the adherence to our company's core values; honesty, integrity, respect for others and a belief in the fundamental importance of trust, openness, teamwork, professionalism and pride in what we do.

COMMITMENT TO SAFETY

Energy International Corporation is dedicated to creating a safe, and secure working environment for all of our employees. Our employees are our most important asset and we will do whatever is necessary to make sure they are with us for a long time. We have instituted proper safety protocols in all aspect of our operations and have moved beyond simply following rules and regulations by instilling a culture of caring in our company that is carried from the workplace into the world.

COMMITMENT TO SUSTAINABILITY

Energy International is committed to being a conscientious corporate citizen. We have instituted practices within our company to use our resources wisely, reducing waste, conserving energy and reducing our environmental footprint. We strive to assist our customers with the same goals by supplying them with products and technologies that adhere to the principals of energy conservation.

BUSINESS STRATEGY

Energy International Corporation understands the importance of building lasting and valued relationships with our customers and suppliers. We fully understand that our success for the last 38 years is due to the relationships we have built with those we do business with.

We believe that the demand for genuine engineering innovation will be integral to the global need for economic development for years to come. Our objective is to search for, and develop business avenues to meet the ever-evolving demands for these engineering products and services.

Our role is to ensure that we deliver this innovation profitably and in environmentally and socially responsible ways. This strategy ensures profitability and growth for all involved.

RESPONSIBILITY

Energy International Corporation and its group of companies recognize four areas of responsibility. These responsibilities are the foundation of the Energy International Corporation. They are our core values in action, a testament to the high standards that we adhere to in service to our partners in business.

Our Customers: To strive to win and maintain customers by developing and providing products and services that offer value in terms of price, quality, safety and environmental impact. To support these efforts with a knowledgeable workforce trained in the latest technologies and attuned to the most current market conditions.

Our Employees: To respect the human rights of our employees and provide them with a safe place to work and access to all of the resources they need to properly complete their jobs. To provide an inclusive work environment where every employee has an equal opportunity to develop their special talents. To encourage employees to involve themselves in the planning and direction of their work and help them recognize that success depends on the full commitment of all concerned.

Our Business Partners: To seek mutually-beneficial relationships with our contractors, customers, suppliers and joint ventures and to build these relationships on the foundation of Energy international's core values and business principals.

Our Society: To conduct business as responsible corporate members of society. To comply with applicable laws and regulations. To support fundamental human rights in line with the legitimate role of business and to give proper regard to health, safety, security and the environment.
