To Our Team, Partners, and Friends of EIC

I have always believed that the strength of an organization is best measured not in times of ease but in times of challenge. And so, I write to you today openly and honestly as we navigate a period of regional uncertainty that none of us anticipated, but all of us are committed to facing together.

The geopolitical situation unfolding across the Middle East is affecting communities, businesses, and families throughout the region. Tourism and development activity in the UAE has slowed, and some of the momentum that has defined this region over the past decade will take time to rebuild. That is the honest reality, and I believe you deserve to hear it plainly.

Energy International has weathered significant storms before. During the Gulf Wars, when conflict reshaped the region and uncertainty paralyzed markets, we held our ground. In 2020, when COVID-19 brought the global economy to a standstill, GCC's airports went quiet, projects froze, and supply chains collapsed overnight. And yet we did not lose a single member of our team. We made hard decisions together, shared the burden collectively, and when the recovery came, we were positioned to grow with it. These experiences did not just test us. They defined us. The resilience, agility, and loyalty we built through each crisis are the same principles guiding us today. We are responding strategically by diversifying our portfolio toward life safety, infrastructure, healthcare, and essential building systems, and deepening our presence across the broader GCC, where investment continues. Most importantly, we are doing what we have always done: putting our people first.

To our employees, thank you for your trust and dedication. To our partners and clients, thank you for your continued confidence. We remain fully committed to the quality and service that have always defined us.

The road ahead requires patience, creativity, and resolve. We have all three.

With gratitude and confidence in what lies ahead,

Rami Fawaz
President
Energy International Corporation

Be a Part of the Energy International Report

The EIC Report is designed to present the happenings at EIC so that we may keep our employees and partners informed (from the acquisition of multi-million dollar contracts to the latest additions to the EIC family). We need your participation to help make it a success. We'd also like to know what you think about the newsletter content and format and how we can make it better. Send all your news, information, thoughts, and ideas to sbaustin@energyintl.com. I look forward to hearing from you.

EIC report is published four times a year by and for the employees of Energy International Corporation and their friends and associates. All inquiries should be sent to the Communications Director at: sbaustin@energyintl.com.

Keeping It Cool, Safe, and Clean

Energy International Jordan upgrades and replaces the chiller system at InterContinental Aqaba-Jordan

As part of our ongoing HVAC services and commitment to delivering reliable and efficient cooling solutions, our team at Energy International Jordan successfully completed the replacement of a rooftop chiller at the InterContinental Aqaba Resort.

The project involved the safe removal of the existing chiller from the hotel rooftop and the installation of a new YORK inverter chiller, model YVAA0490. The lifting operation required detailed planning and coordination due to the location of the equipment and the operational requirements of the hotel.

A specialized crane operation was carried out to lower the old chiller and lift the new unit to the rooftop, ensuring full compliance with safety procedures and manufacturer recommendations. Following the successful lifting and positioning of the new chiller, our electromechanical team proceeded with the mechanical and electrical connections, as well as the necessary network modifications to integrate the new system with the hotel's chilled water network.

This project reflects the technical capabilities, planning, and teamwork of our HVAC department in executing complex lifting and installation works within operational hospitality environments while ensuring minimal disruption to hotel activities. ■

Planned and specialized crane operations were required to safely remove the resort's old system.

The team carefully installed the new chiller, completing mechanical, electrical, and network connections to integrate it into the hotel's chilled water system. It's inspiring to see such efficient and productive teamwork!

News - Energy Industrial Company

Energy Industrial at AHR Expo 2026 | Las Vegas: Our team recently visited Las Vegas to participate in the AHR Expo. We were also pleased to participate in the Twin City Fan & Blower Companies' Bullseye Bash, which strengthened connections within our extended engineering network. The active presence of our CEO, Dr. Ned Fawaz, throughout the event reflects a core leadership value: direct involvement and long-term vision.

Energy Industrial Company Product Highlight: The AXF 1250 Inline Axial Fan, engineered for high-end projects and equipped with Circular Padded Attenuators (Bullet Silencers) on both the inlet and outlet, each with a one-diameter length for optimal sound attenuation.

Production Manager at EID, Engr. Bashar Sallouh recently visited Twin City Fan & Blower in the USA. During the visit, he met with Twin City technical teams to explore emerging technologies, discuss manufacturing best practices, and deepen the exchange of expertise that drives innovation across our operations.

Energy Industrial Company had the pleasure of welcoming the technical team from Scientech, one of the UAE's leading engineering companies, with a long-standing partnership with Siemens, to conduct a seminar.

News - Energy Industrial Company

In January 2026, the annual lunch was held at the Energy Industrial plant, giving the entire EID family a chance to come together. From skilled labor on the production floor to top management, Energy Industrial Company celebrated the successful closure of 2025 and the journey that brought us here. 🇸🇦

Teamwork built 2025. Together, we step into 2026

In January 2026, the annual lunch was held at the Energy Industrial plant, giving the entire EID family a chance to come together. From skilled labor on the production floor to top management, Energy Industrial Company celebrated the successful closure of 2025 and the journey that brought us here. 🇸🇦

**Celebrating a year of hard work,
together**

Iftar Gathering with The Roads and Transport Authority and Energy International Corporation

On 11 March 2026, Energy International had the pleasure of hosting a wonderful Iftar gathering at Al Hallab, Garhoud, Dubai, bringing our team together with our valued partners from the RTA.

The evening was filled with meaningful conversations that strengthened partnerships alongside a shared spirit of unity during the holy month of Ramadan. It was a great opportunity to connect beyond work and celebrate togetherness.

We extend our sincere appreciation to everyone who joined us and made the evening truly special. Ramadan Mubarak! 🌸

Energy International Wins Twice Ahead of ASHRAE

Energy International Corporation was the only twice-awarded company at Tower Tech's Customer Appreciation Event

Oklahoma-based manufacturer Tower Tech USA honored Energy International with the achievement of receiving two awards at its Customer Appreciation Event ahead of the 2026 ASHRAE Expo in Las Vegas, Nevada. The event was held at the Mob Museum in Las Vegas prior to the official kick-off of ASHRAE and was attended by Energy International's President, Rami Fawaz, and CEO, Dr. Ned Fawaz.

Energy International was recognized as Tower Tech's "Top International Distributor" and the second "Largest Overall Distributor," which included domestic markets. EIC was the only company to receive two awards during the event. Tower Tech, a leading manufacturer of patented fiberglass cooling towers, is known for its unique "upside-down" modular design, which places fans at the bottom to improve efficiency and protect the system. They are on the cutting edge of development, answering the massive demand for data centers and HVAC technology; an edge that Energy International happy is to walk with them.

The partnership between Tower Tech and Energy International has been a model of efficiency and cooperation, from parts and service needs to installation projects. We at Energy International want to thank Tower Tech USA for the distinct honor we have

been awarded, and we look forward to many years of collaboration to come. 🇺🇸

CEO Ned Fawaz and President Rami Fawaz, alongside TowerTech's Shane Weyant, President Mathu Solo, and Sales Director Micah Curtis, accept the "Top International Distributor" award at Tower Tech's customer appreciation event.

Pictured Above: CEO Dr. Ned Fawaz and President Rami Fawaz, alongside TowerTech's Micah Curtis, Mathu Solo, Kilder Serrano, and the rest of the executive suite of TowerTech USA at TowerTech's Customer Appreciation Event in Las Vegas, Nevada.

Energy International at the Transit-Oriented Development Workshop

Designing Cities Around People

Energy International is proud to share its participation in the Transit-Oriented Development (TOD) Workshop, held on 5th February 2026 at RATP Dev Mobility, Cairo, Egypt, and organized by UITP MENA.

Representing Energy International, our Business Development Manager, Mr. Chadi Farran, joined regional and international mobility leaders to engage in high-level discussions on how Transit-Oriented Development can shape more connected,

walkable, and people-centric cities across the MENA region and beyond.

Energy International’s participation reflects our continued commitment to sustainable mobility, integrated transport solutions, and shaping future-ready cities designed around people. 

Transit-Oriented Development Workshop Highlights

- **MENA Cities Re-imagined – Unlocking the Power of Transit-Oriented Development (TOD).**
Exploring how integrated mobility and urban planning can drive sustainable growth.
- **First-Last Mile Solutions in Abu Dhabi.**
Integrating micro and shared mobility within TOD frameworks.
- **Transit-Oriented Development strategies supporting Vision 2030.**
Aligning mobility and urban development in the Holy Cities.
- **Enhancing Access & Walkability to Public Transport in Greater Cairo.**
- **Data-Driven Transit Planning to accelerate TOD implementation.**
- **Global insights from Barcelona, Delhi, and Istanbul.**
Showcasing sustainable mobility strategies and system transformation.

Energy International Employees Announcements

Energy International Corporation is continuing to grow. Please take a moment to welcome our new employees and celebrate with those who have work anniversaries and promotions. We thank you all for your dedication to making EIC a success.

Eng. Jibrail Aslam has joined our team in Riyadh as sales engineer. Jibrail joins Energy International Corporation as a graduate from China University of Petroleum with over 7 years of experience in technical sales across leading firms, specializing in kitchen ecology units, fans, air filtration systems, and HVAC accessories.

Energy International organized a New Year's party at the Kitchen 6 restaurant located at JW. Marriott Marquis Hotel- Dubai. The entire staff was present along with our manager, Mr. Shabbir Basheer, and our General Manager, Mr. Joseph Moussallem.
