To Our Managers, Employees, and Friends

As we move into the third quarter of 2026, we look back on Energy International's performance over the past 9 months. I am pleased with the performance of almost every office, except the Qatar office, which is at a standstill due to the crisis in the Middle East.

Most offices, including Lebanon, Iraq, Jordan, Jeddah, Riyadh, Dammam, Sharjah, and Abu Dhabi, as well as our affiliate companies Energy Industrial, Green Energy, and Energy Parking and Transportation, all exceeded their targets. We expect the trend to continue over the last 3 months of the year.

However, we must remain cautious due to geopolitical issues in Saudi Arabia, Yemen, the Strait of Hormuz, and the possible expansion of war throughout the Middle East. We must plan carefully for next year to reduce overhead, maintain profits, and cover expenses to avoid major changes in the company.

While we are concerned about future developments in the Middle East, we are still planning to expand by introducing new product lines, gaining new customers, quoting on larger projects, and developing additional markets. One important issue we are addressing is expanding our manufacturing capabilities for the products we represent, since shipping costs have become sky-high for products from Europe or the US. Therefore, local manufacturing and assembly will be the key to our future markets.

We plan to establish an office in Damascus, Syria. We will also look toward Africa by either appointing distributors or opening our own offices. While Africa is a difficult and risky market, our international presence and industry experience have prepared us for the challenge.

All managers are responsible for expanding the product line in the mechanical-electrical field and creating opportunities for new products. Additionally, managers and accountants must closely examine operating costs to ensure they can be maintained by reducing costs and preparing for the possibility of the war expanding further.

We all hope and pray that peace will return. Lives must be saved and property protected for all countries involved. I hope that the next newsletter will have more positive news from throughout the Middle East.

Ned Fawaz

Energy International Installs Energy Saving Chillers In Jordan's City Mall

The Jordan Office successfully implemented a 3-phase plan that resulted in the installation of 7 York chillers for the Amman City Mall renovation project

Energy International's Jordan office has successfully completed a 3-phase plan that now sees Jordan's Amman City Mall with a 2,500 ton capacity over a 7-chiller network. The project spanned 12 years.

• Phase 2 - 2018

The project was based on energy saving. EIC Jordan supplied City Mall with 3 YORK chillers, with a total capacity of 1,000 tons. The project achieved 40% energy savings, with a 2.5-year payback period.

The project required careful planning and execution to maintain safety and ensure customer satisfaction.

• Phase 2 - 2018

Following the success of Phase 1, the Jordan City Mall purchased 3 additional YORK chillers, with a total capacity of 1,000 tons.

Following completion of the project, Amman's City Mall now boasts a 7-chiller, 2,500 ton capacity network.

• Phase 3 - 2026 / Additional YORK Chiller

Following the successful implementation of Phases 1 and 2, City Mall decided to purchase one additional York chiller to replace all the remaining old units. As a result, City Mall now operates a total of 7 YORK chillers, with a total capacity of 2,500 tons. 🇯🇴

EIC Contributes to UITP's Global Parking Transformation Working Group

Energy International Parking & Transportation is a proud contributor to the UITP initiative

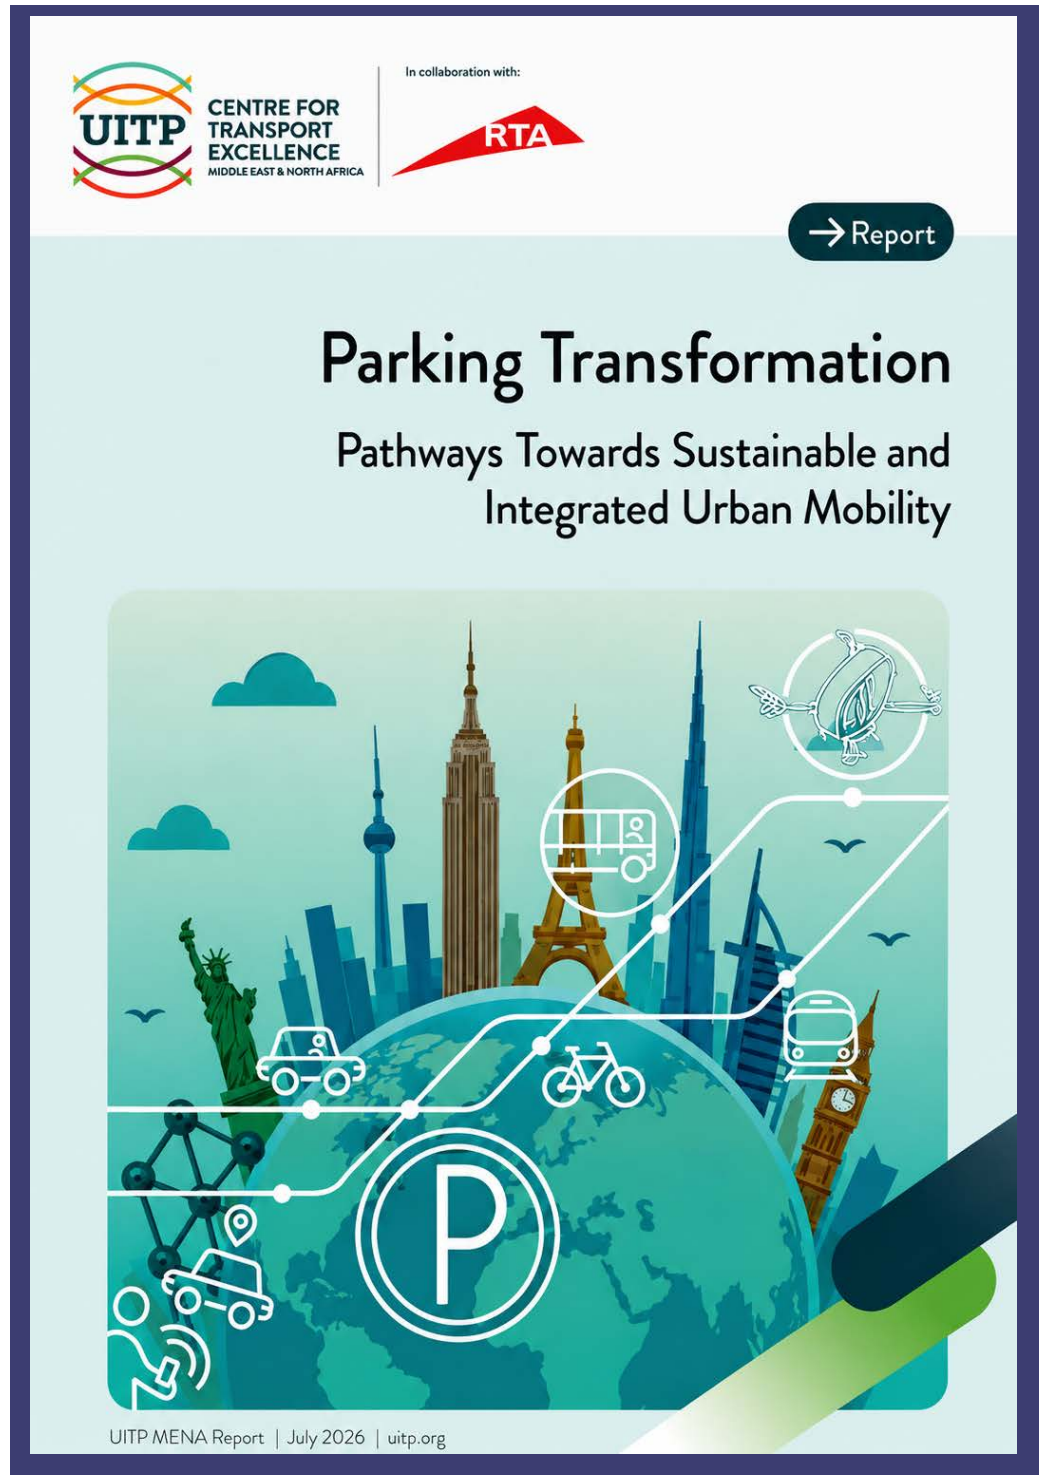

Energy International is proud to be an active working member of the UITP Global Parking Transformation group, contributing alongside leading transport authorities, operators, technology providers, and mobility organizations to discussions around the future of parking and urban mobility. The group's first study, "Parking Transformation: Pathways Towards Sustainable and Integrated Urban Mobility," explored how parking can become an integral part of sustainable urban mobility.

The Parking Transformation initiative aims to rework parking as a "passive infrastructure" into a strategic tool that supports urban development objectives.

Source: www.uitp.org

Key transformation strategies include Park & Ride, dynamic pricing, shared mobility parking, mobility hubs, and smarter use of curbside space. This newest study identifies governance, technology, and financing as key enablers for a successful parking system.

Through its participation, Energy International is proud to help shape smarter, more connected, and sustainable urban mobility solutions. ■

A SMART Parking Milestone: 87 Solar Powered Parking Poles Deployed

Energy International Parking and Transportation installed the SMART parking devices throughout Sharjah, UAE

As part of Energy International's projects in Sharjah, we are pleased to highlight the successful installation of 87 solar-powered SMART parking poles with ANPR cameras across the Emirate of Sharjah since 2024.

The Solar-Powered SMART parking poles are equipped with advanced FalconEye/Candid ANPR cameras, providing reliable vehicle detection and monitoring capabilities.

A key element of the project is the backend software, which the Energy International team developed in-house through multiple development stages to ensure the system meets the project's high technical and operational requirements.

SMART parking monitoring systems have been strategically deployed across key tourist destinations and important civic locations throughout the Emirate of Sharjah, UAE, including

The new parking poles rely on solar power to deliver reliable vehicle identification.

Sharjah City, Khor Fakkan City, Kalba City, and Al Dhaid City.

This milestone demonstrates Energy International's ability to deliver integrated smart parking solutions, combining advanced hardware, intelligent ANPR camera technology, and in-house software development.

The SMART parking system utilizes ANPR (Automatic Number Plate Readers) to digitize Sharjah's parking network.

Source: Gulf Business

The successful deployment further reinforces Energy International's commitment to delivering innovative and reliable smart mobility solutions across the UAE. ■

Planned Preventive Maintenance (PPM) agreement signed on 27-July-2026 - KSA

- **Client:** Dr. Sulaiman Al Habib Medical Group
- **Scope:** 3 Years Preventive Maintenance for fire curtains
- **Coverage:** 12 hospitals & medical centers across KSA
- **Total number of Fire Curtains:** 539 units
- **Contract Period:** August – 2026 to August – 2029

KSA Updates and Employee News

Project Name: Nursery Facilities Enhancement Program in King Abdulaziz International Airport (KAIA) - Jeddah - KSA

- **Scope of Work:** Supply of chilled water valves
- **Client Name:** Jeddah Airports Company – JedCo
- **Contractor Name:** Bashaer Al–Benaa Contracting
- **Consultant Name:** SJ Group

Energy International Employees Announcements

Energy International Corporation is continuing to grow. Please take a moment to welcome our new employees and celebrate with those who have work anniversaries and promotions. We thank you all for your dedication to making EIC a success.

Terry Matthew

Energy International proudly congratulates Terry from the Dubai Parking & Transportation Department on achieving his Project Management Professional (PMP) Certification, reflecting his dedication to professional growth and excellence. The PMP certification is a globally recognized credential demonstrating expertise in project leadership and management. Terry's achievement reflects his hard work, commitment, and perseverance, and inspires the entire team. Energy International is proud to support our employee's professional development and success.

Congratulations, Terry! We wish you continued success and many more milestones ahead!

News - International Travel News

Energy International's CEO, Dr. Ned Fawaz, toured our various offices during his international Summer Trip.

(Pictured at top) Mr. Fawaz met with our Abu Dhabi office, managed by Joseph Moussallem.

(Pictured on bottom) The Amman office in Jordan hosted Mr. Fawaz at an office-wide luncheon; the Jordan office is managed by Mr. Fadi Rashid.
